3. The Future of Cancer Treatment?

SCIENTISTS DEVELOP NEW KIND OF PHOTON BEAM WHICH MAY BE SECRET WEAPON AGAINST CANCER

<https://www.rt.com/news/474908-photon-beam-secret-weapon-cancer/>

4. Rising Cancer Rates

Timeline of cancer propagation in the United States

1900 – Cancer (especially lung cancer) is rare. Only about 90 people out of every 100,000 are diagnosed with it.

1905 – The AMA begins suppressing known natural cures for ailments of all sorts and removes nutritional education from medical college curriculum.

1930 – Any scientists and physicians who discover cures for cancer find their labs destroyed or materials confiscated, then they're arrested, silenced or murdered (this is still happening today, by the way).

1930s – FDA, AMA, and CDC suppress and deny natural cures and prevention strategies for cancer.

1930 – Microbiologist Dr. Royal Rife proves that if microbes inside cancer cells are killed, the cells revert back to normal ones.

1931 – Doctors from around the country join Dr. Raymond “Royal” Rife, who invented the first high-powered microscope that could directly observe bacteria and viruses, as he isolates a filterable virus of carcinoma and succeeds in destroying the typhus bacteria, not to mention the herpes virus and even strains of polio.

1937 – The AMA indicts Dr. Rife for “fraudulent” medical practices.

1938 – The AMA visits all doctors who [support Dr. Rife](#) (and those who use his instrument inventions) warning them that if they continue they will “lose their medical license.”

1939 – The AMA and the FDA destroy Dr. Rife’s lab (and attempted to destroy all of his research, including his academic committee records) because his cancer cure rate was 100 percent among his patients.

1939 – The AMA literally pays a cancer researcher, Dr. Arthur Kendall, over \$250,000 (that would be worth about \$5 million today) to stop working on cancer cures and retire in Mexico, where he owned land.

1944 – Dr. Kendall dies of mysterious, unknown causes.

1940s – Lung cancer is scientifically discovered to be caused by smoking cigarettes, yet the AMA and 20,000 doctors endorse cigarettes as healthy and good for digestion for thirty more years.

1945 – The auspicious beginning of [water fluoridation](#) begins in Grand Rapids, Michigan just as WWII ends. Hitler had previously used the same type of fluoride in the drinking water in concentration camps to weaken the Jews to keep them from rebelling.

1950 – Post WWII food factories and plants begin processing American food in cans, adding cancer-causing chemical additives and chemical preservatives.

1955 – Dr. Jonas Salk removes kidneys of rhesus monkeys, injects them with three different strains of polio and incubates them to stimulate growth of the virus. Then he dilutes the combination of strains with formaldehyde to weaken the virus, then injects it into live monkeys, mice and rabbits and claims, along with CDC, the new “miracle vaccine of the century!” has been discovered and that it’s “safe, potent

and efficient.” Fake polio vaccine cure is shipped in vials all over the world. The false “herd theory” is invented.

Late 1950s – Polio vaccines given to nearly 100 million Americans contaminated with hidden leukemia and SV40 cancer viruses (it was all [admitted and recorded by Merck scientist](#) named Dr. Maurice Hilleman, who was there at the time and witnessed it all). He’s now called the “Forgotten Hero.”

1963 – Researchers inject cancer cells into 19 elderly, debilitated patients at a Jewish Chronic Disease Hospital in Brooklyn, NY. The pharma-funded experiment was carried out on blacks and Jews that were prisoners because “they were cheaper than chimpanzees,” according to pharma industry officials.

1970s – Invasive medical procedures become the “norm” for treating cancer, including surgery, radiation, mammograms, chemotherapy and other dangerous toxic pharmaceuticals.

1971 – President Nixon declares the fake “War on Cancer” by launching the “National Cancer Act” while dishing out a cool \$100 million to front groups, including NCI (National Cancer Institute) funds for promoting toxic chemotherapy.

1970s – Dr. Stanislaw Burzynski finds an advanced, cutting edge and non-toxic gene-targeting cure for even the most lethal forms of cancer (such as brain cancer and tumors on the spines in children).

1977 – The FDA raids Dr. Burzynski’s clinic, steals his patented formulas, seizes 12,000 patient records, purposely dilutes the most important ingredients of his neoplastons formula, then claims it doesn’t work after running tests (Dr. Burzynski is still curing people of cancer today at his clinic in Texas).

1980s – Genetically modified organisms (GMOs) introduced to corn and soy across USA. Genetically engineered and mutated produce in America would now be infected with insecticides and herbicides from the inside out.

1980s – Komen Foundation, American Cancer Society, National Cancer Institute, Karmanos Cancer Institute, and many more [front groups](#) all raise money (for administrative salaries and costs mainly) while pretending to “search for cure” for cancer.

2010 – Google, YouTube and Social Media controllers begin massive purge of all information about curing cancer, natural remedies, CBD oil, hemp, etc.

2012 – National Cancer Institute (NCI) spends over \$1.2 billion annually to bury natural cures.

2018 – Mercury is still used in vaccines, including flu shots, while CDC lies and says that it is not. There is no safe level of mercury, formaldehyde or aluminum that can be injected into a human.

2018 – Toxic sodium fluoride is still insidiously dripped into municipal tap water for the majority of Americans to consume.

<https://www.sott.net/article/301755-Number-one-cause-of-childhood-death-in-US-Cancer>

In children, cancer is the number one cause of death by disease. In fact, it is responsible for more deaths than all other diseases combined.

Many video presentations on the issue of rising cancer rates:

https://www.youtube.com/results?search_query=rising+cancer+rates

5. GOOD NEWS? OUCH.

Cancer Deaths See Largest Drop on Record As Overdoses, Suicides Soar

<https://www.zerohedge.com/economics/cancer-deaths-see-largest-drop-record-overdoses-suicides-soar>

6. Causes of Cancer

According to Wikipedia, which is full of lies and half-truths about human health, cancer has numerous causes (https://en.wikipedia.org/wiki/Causes_of_cancer#Diet), but it never admits that the more industrially advanced and developed a country is, the higher its cancer rate will be. The chart below proves this. It measures the number of new cancer cases per 100,000 population among countries, based on the 2012 and 2014 GLOBOCAN statistics.^[1] It excludes non-melanoma skin cancer.

Which countries have the worst cancer rates? The most industrialized and developed, or the poorest and least developed? What explains this pattern?

Rank	Country	Cancer rate
1	 Denmark (Excessive smoking, drinking, and)	338.1
2	 France	324.6
3	 Australia	323.0
4	 Belgium	321.1
5	 Norway	318.3
6	 United States	318.0
7	 Ireland	307.9
8	 South Korea	307.8
9	 Netherlands	304.8
10	 New Caledonia	297.9
11	 Slovenia (note: Slovenia was bombed with radioactive, depleted uranium by NATO)	296.3
12	 Canada	295.7
13	 New Zealand	295.0
14	 Czech Republic	293.8

Rank	Country	Cancer rate
15	 Switzerland	287.0
16	 Hungary	285.4
17	 Iceland	284.3
18	 Germany	283.8
19	 Israel	283.2
20	 Luxembourg	280.3
21	 Italy	278.6
22	 Slovakia	276.9
23	 United Kingdom	272.9
24	 Sweden	270.0
25	 Serbia (note: Serbia was bombed with radioactive, depleted uranium by NATO)	269.7
26	 Croatia (note: Croatia was bombed with radioactive, depleted uranium by NATO)	266.9
27	 Barbados	263.1
28	 Armenia	257.0

Rank	Country	Cancer rate
29	 Finland	256.8
30	 French Polynesia	255.0
31	 Austria	254.1
32	 Lithuania	251.9
33	 Uruguay	251.0
34	 Spain	249.0
35	 Latvia	246.8
36	 Portugal	246.2
37	 Martinique	245.0
38	 Malta	242.9
39	 Estonia	242.8
40	 Macedonia	239.3
41	 Montenegro	238.3
42	 Kazakhstan	236.5

Rank	Country	Cancer rate
43	 Bulgaria	234.8
44	 Poland	229.6
45	 Romania	224.2
46	 Belarus	218.7

Rank	Country	Cancer rate
47	 Cuba	218.0
48	 Japan	217.1
49	 Argentina	216.7
50	 Puerto Rico	211.1

Rank	Country	Cancer rate
51	 Turkey	205.1
52	 Chile	175.7
53	 Greece	163.0
54	 Mexico	131.5

Wikipedia and the cancer industry never admit that fluoridated water (common in most Canadian cities), pesticides, herbicides, sedentary (inactive) lifestyles, sugar, pharmaceutical-prescription medicines, vaccines, and air pollution can cause cancer.

7. Corruption in the Cancer Industry

(NaturalNews – All figures apply to the United States)

With \$100 billion a year now being spent on toxic chemotherapy treatments that damage patients and cause "chemo brain" side effects, a panel of cancer experts commissioned by the National Cancer Institute publicly admitted two years ago that tens of millions of "cancer cases" aren't cancer at all.

Tens of millions of people who have been diagnosed with "cancer" by crooked oncologists -- and scared into medically unjustified but extremely profitable **chemotherapy treatments** -- never had any sort of life-threatening condition to begin with, scientists have confirmed.

https://www.naturalnews.com/051482_cancer_industry_overdiagnosis_false_positives.html

The for-profit cancer industry earns its revenues based on **repeat business** from cancer treatments that don't prevent cancer or reverse cancer. Instead, today's fraudulent cancer treatments like chemotherapy and radiation actually CAUSE more cancer!

The absolute last thing the cancer industry wants is for knowledge of cancer prevention strategies (and cancer cures) to spread among the public. Such knowledge threatens their very existence and takes away the profits they've been counting on from treating cancer in 1 out of 3 people for the foreseeable future...

Make no mistake, the cancer industry's entire profit model is based on **keeping people ignorant about cancer causes while keeping them dependent on cancer treatments that don't work**. That combination is the ultimate profit generation scheme for the cancer industry, despite all the suffering, pain and death it causes to human beings who are all victims of the industry.

The cancer industry so steeped in criminality that its own doctors and oncologists routinely rely on **false positive diagnoses** to earn huge profits by falsely telling people they have cancer, then "treating" them with chemotherapy. Some of the worst fraudsters and criminals operate in Detroit, Michigan, where Dr. Farid Fata was recently prosecuted and jailed for committing what can only be called "medical murder." He falsely diagnosed thousands of healthy people with cancer, ultimately dosing them with high-profit chemotherapy -- as many as 50 people a day! -- destroying their health while pressuring them to stay on the chemo to "get rid of the cancer." Corruption, profits and the cost of healthcare

30 minute video
https://www.naturalnews.com/053514_cancer_cures_documentary_media_censorship.html

(NaturalNews) The cancer industry is a for-profit industry that relies on repeat business to keep padding its bottom line. David Bowie and Alan Rickman are just two of the industry's latest victims, but there will sadly be millions more.

Chemotherapy alone kills an estimated one million people a year. See PharmaDeathClock.com for a running tally...

Anyone who thinks the cancer industry would ever research and release an actual cancer "cure" is delusional... there's no chance that a multi-billion-dollar industry will deliberately make itself obsolete and obliterate its entire business model.

The entire cancer industry is based on pure **scientific fraud**. Out of 53 "landmark" studies cited by the cancer industry to push chemotherapy and other toxic treatments, [88 percent were found to be completely fabricated](#).

Similarly, a recent study conducted at the *Fred Hutchinson Cancer Research Center* in Seattle, Washington found that [tumors grow FASTER after chemotherapy treatments](#), meaning chemo accelerates tumor growth and spreads the cancer.

https://www.naturalnews.com/052678_David_Bowie_Alan_Rickman_for-profit_cancer_industry.html

<https://www.naturalnews.com/2017-02-01-fda-quietly-bans-powerful-life-saving-iv-bags-with-vitamin-c.html>

Relative deficiency hypothesis

[Linus Pauling](#)'s popular and influential book *How to Live Longer and Feel Better*, first published in 1986, advocated very high doses of vitamin C.

Humans and other species that do not synthesize vitamin C carry a mutated and ineffective form of the enzyme [L-gulonolactone oxidase](#), the fourth and last step in the ascorbate-producing machinery. In the anthropoids lineage, this mutation likely occurred 40 to 25 million years ago. The three surviving enzymes continue to produce the precursors to vitamin C, but the process is incomplete and the body then disassembles them.

In the 1960s, the [Nobel-Prize](#)-winning chemist [Linus Pauling](#), after contact^[21] with [Irwin Stone](#), began actively promoting vitamin C as a means to greatly improve human health and resistance to disease. His book *How to Live Longer and Feel Better* was a bestseller and advocated taking more than 10

grams per day orally, thus approaching the amounts released by the liver directly into the circulation in other mammals: an adult [goat](#), a typical example of a vitamin-C-producing animal, will manufacture more than 13,000 mg of vitamin C per day in normal health and much more when stressed.^[citation needed]

[Matthias Rath](#) is a controversial German physician who worked with and published two articles discussing the possible relationship between [lipoprotein](#) and vitamin C with Pauling.^{[22][23]} He is an active proponent and publicist for high-dose vitamin C. Pauling's and Rath's extended theory states that deaths from scurvy in humans during the ice age, when vitamin C was scarce, selected for individuals who could repair arteries with a layer of [cholesterol](#) provided by lipoprotein(a), a lipoprotein found in vitamin C-deficient species.^[24]

Stone^[25] and Pauling^[11] believed that the optimum daily requirement of vitamin C is around 2,300 milligrams for a human requiring 2,500 [kcal](#) a day. For comparison, the FDA's recommended daily allowance of vitamin C is 90 milligrams.^[1]

12. Conventional Views and Laws Regarding Alternative Medicine: all articles

If you have researched any naturopath, herbalist or plant-based cure for cancer, compare what you learned to the information at Wikipedia or in any other encyclopedia. See if books about these cures are in your library.

Wikipedia—read just the first page/screen, the intro.

https://en.wikipedia.org/wiki/Alternative_medicine#Herbal_remedies_and_other_substances_used

For example, compare what the naturopathic world says about soursop and compare to the info at

https://en.wikipedia.org/wiki/Soursop#Alternative_cancer_treatment

Family flees from the U.S. to avoid chemotherapy and the daughter is cured with alternative methods

13. The Weaponization of Cancer

From <https://williamblum.org/aer/read/157>

Then consider the case of Hugo Chávez. When he died in 2013 I wrote the following: “[W]hen someone like Chávez dies at the young age of 58 I have to wonder about the circumstances. Unremitting cancer, intractable respiratory infections, massive heart attack, one after the other ... It is well known that during the Cold War, the CIA worked diligently to develop substances that could kill without leaving a trace. I would like to see the Venezuelan government pursue every avenue of investigation in having an autopsy performed.” (None was performed apparently.)

Back in December 2011, Chávez, already under treatment for cancer, wondered out loud: “Would it be so strange that they’ve invented the technology to spread cancer and we won’t know about it for 50 years?” The Venezuelan president was speaking a day after Argentina’s leftist president, Cristina Fernández de Kirchner, announced she had

been diagnosed with thyroid cancer. This was after three other prominent leftist Latin America leaders had been diagnosed with cancer: Brazil's president, Dilma Rousseff; Paraguay's Fernando Lugo; and the former Brazilian leader Luiz Inácio Lula da Silva.

"Evo take care of yourself. Correa, be careful. We just don't know," Chávez said, referring to Bolivia's president, Evo Morales, and Rafael Correa, the president of Ecuador, both leading leftists.

Chávez said he had received words of warning from Fidel Castro, himself the target of hundreds of failed and often bizarre CIA assassination plots. "Fidel always told me: 'Chávez take care. These people have developed technology. You are very careless. Take care what you eat, what they give you to eat ... a little needle and they inject you with I don't know what.'"

When the new Venezuelan president, Nicolas Maduro, suggested possible American involvement in Chávez's death, the US State Department called the allegation "absurd" even though the United States had already played a key role in the short-lived overthrow of Chávez in 2002. I don't know of any American mainstream media that has raised the possibility that Chávez was murdered.

I personally believe, without any proof to offer, (although no less than is offered re Russia's guilt in the UK poisoning) that Hugo Chávez was indeed murdered by the United States. But unlike the UK case, I do have a motivation to offer: Given Chávez's unremitting hostility towards American imperialism and the CIA's record of [more than 50 assassination attempts against such world political leaders](#), if his illness and death were NOT induced, the CIA was not doing its job. The world's media, however, did its job by overwhelmingly ignoring such "conspiracy" talk, saving it for a more "appropriate" occasion, one involving their favorite bad guy, Russia.
