

COVID Is a Racket II

COVID is a racket. It was always intended to be.

It is constantly spoken about and it is possibly the most manipulative scheme. It is being promoted by all world leaders. It is profitable at the cost of citizen's wellbeing. It is making the rich get richer and the public suffer.

The government and the media encourage us to receive the COVID vaccine. They say that receiving it is a choice, but those who say "no" have their freedom taken away. Schools may make the vaccine necessary. Stores may make the vaccine necessary. Recreation centers may make the vaccine necessary. Airports may make the vaccine necessary. Living may become impossible for the unvaccinated.

If doctors and scientists were not able to isolate the coronavirus, then is it really worth locking people in their homes, separating families, requiring people to wear masks, and creating a vaccine? Is a vaccine whose symptoms are unknown worth injecting into the population? The "ingredients" of the vaccine are not disclosed to the public, so how can we trust that the government has the best intentions for us? These vaccines would be the perfect opportunity for higher-ups to inject something unwanted into our bodies.

How many of those who profited off COVID struggle to keep their businesses alive? How many are being told to wear masks to purchase groceries for their families? How many of them are being told to stay in their homes for months? How many are only able to see their families on a screen? How many of them are struggling to pay their bills?

What are we doing to give the rich even more unnecessary money? Youth are being forced to sacrifice a portion of their lives to spend time isolated with a screen, local business owners are forced to struggle to stay financially solvent, citizens must suffocate themselves to be able to purchase necessities, and people are injecting unknown substances into their blood.

What does this lifestyle have in store for us? Will people open their eyes to the deception happening? Only time will tell.
