

Covid-19 is a Racket III

Covid-19 has fooled everyone. The media has convinced everyone that a virus has declared war against us. Now governments are using this disease as an excuse. Now governments are announcing false information to scare the people into compliance. Now they're threatening and forcing us to obey. Why? Profits. Covid-19 is now a racket.

How is it a racket? Most people trust their governments. Very few really know what's going on. Governments and **corporations** are making fortunes while we don't benefit at all. No one is benefiting except for that small group of people.

Governments have forced and threatened us to listen to their orders and cooperate with them. When everything first started, people were instructed to wear masks, because they were supposed to "prevent" you from catching this disease. People without a mask were not allowed in any buildings. But masks don't actually work. They were mandated just to convince people that Covid-19 is a dangerous disease.

Even now, if people refuse to obey, they are fined. However, the government deceives us. They expect us to believe that refusing to wear a mask is against the law, but this was actually never enforced. Because we're so naive, many intelligent people have been fined. Fraud, again.

Governments have even been experimenting on us. There is no proof that vaccines work at all, and yet people are rushing to receive their vaccines. Some people have even returned for second doses. As of June 7 2021, about 2.12 billion doses have been given, and around 458 million people have been fully vaccinated worldwide.

Not only do vaccines not work, they harm us. According to Principia Scientific International, data from the United States, European Union and United Kingdom indicates that RNA vaccines have already caused more than 1000 deaths and other side effects. But we believe in governments more than facts. This is what is causing the death rate to increase.

There are solutions to this problem though. There is a solution to every problem. People are just too foolish to realize and act. One option is just to refuse to obey governments, who can't force us to do anything if no one listens to them. Researching, asking questions, reading books and learning is another solution. There is some information not many people know of, because the government doesn't want us to know about it. For example, many people believe that students are not allowed in school unless they are vaccinated. However, there is an exemption form, which allows a student to enter the building without a vaccination. Governments want us to be vaccinated, so they can make a profit. This is why they have tried to keep this information as secret as possible. With these solutions, governments wouldn't be able to force us to do anything that only benefits them, and we can also prevent ourselves from being stupid or harmed.

So...I say,

TO HELL WITH COVID-19!
